CIRCULAR

Dear Volunteers,

In light of the current global situation, the NSS unit of Al Jamia Arts and Science College has made the decision to transform our upcoming seven-day residential camp into a virtual experience. This virtual camp will take place from December 21st to 27th, 2020. Despite the shift in format, we are committed to delivering an engaging and impactful program.

The virtual camp will feature a diverse array of activities aimed at enriching your knowledge and fostering a sense of community responsibility. Highlights include expert talks, projects, awareness programs, and cultural activities. Key activities include:

- Environmental Cleanup: December 22nd, 2020
- Cultivating Kitchen Gardens: December 23rd, 2020
- Rainwater Harvesting: December 24th, 2020
- Survey on Community Diseases: December 25th, 2020
- COVID Awareness Programme: December 26th, 2020

Your active participation and commitment to these activities will contribute significantly to our collective mission of social responsibility and community engagement.

REPORT

RAINWATER HARVESTING AT STUDENTS' HOME

In a proactive initiative aimed at sustainable water management, students of Poopalam Al Jamia Arts and Science College recently undertook a significant project as part of their NSS virtual camp, named "OJASS". The seven-day camp focused on fostering environmental consciousness and practical application among the youth, culminating in the construction of rainwater harvesting units at their homes.

Under the guidance of NSS programme officer Mr. Abdul Musabir, students enthusiastically took up the challenge to build rainwater harvesters on 24th December 2020. This project not only aimed to educate students about water conservation but also to empower them to take tangible steps towards environmental sustainability.

The initiative was a collaborative effort where students not only received theoretical instructions but also practical guidance on how to construct effective rainwater harvesting systems. Families of the participating students also played a pivotal role by supporting and encouraging their efforts, showcasing a community-driven approach to environmental stewardship.

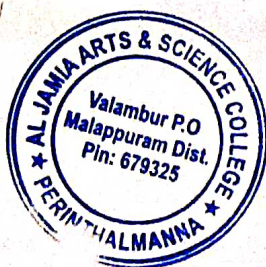

Throughout the seven-day camp, students actively engaged in the construction process, adhering to the guidelines provided by Mr. Abdul Musabir. They diligently implemented the techniques learned, ensuring that the rainwater harvesting units were not only functional but also tailored to their specific household needs.

In a display of their commitment and accomplishment, students documented their progress with images and shared their experiences virtually with the programme officer and their peers. This digital exchange allowed them to celebrate their achievements, discuss challenges faced, and highlight the impact of their efforts on water conservation within their community.

Speaking about their experience, many students expressed profound happiness and satisfaction in contributing to such a meaningful project. They emphasized the importance of taking concrete actions to conserve water resources, especially in the context of increasing environmental concerns globally.

The success of the "OJASS" virtual camp underscores the potential of NSS initiatives in fostering environmental awareness and promoting sustainable practices among youth. By actively participating in constructing rainwater harvesting units, students not only gained practical skills but also became ambassadors for environmental stewardship within their families and communities.

Moving forward, Poopalam Al Jamia Arts and Science College aims to continue integrating such initiatives into its curriculum, further empowering students to become proactive agents of change in environmental conservation. The college administration and NSS programme officers are committed to supporting and expanding these efforts, ensuring a lasting impact on both the environment and the students involved.

As the world grapples with environmental challenges, initiatives like the NSS virtual camp "OJASS" serve as shining examples of how education and community engagement can lead to tangible and sustainable solutions.
