CIRCULAR

Dear Sudents ,

We are excited to announce a significant community service initiative by the students of Al Jamia Arts and Science College in collaboration with the NSS team. We will be building a pond at Mulliyakurussi as part of our commitment to social responsibility and community development. The construction started on 23/12/2018. The primary objective of this initiative is to address acute water scarcity issues in the area by constructing a pond. This project will serve as a vital resource for the community, enhancing water conservation efforts and sustainability.

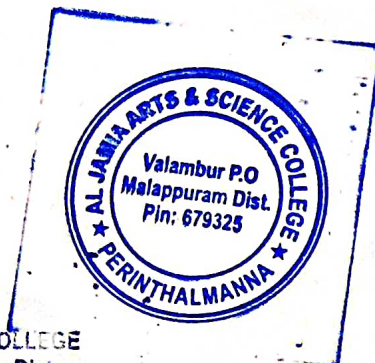

Event Details:

- Commencement Date: December 23, 2018
- Duration: One week
- Location: Mulliyakurussi

Leadership: The programme is led by our esteemed College Principal, Mr. A.P. Riyas, and the NSS Programme Officer, Mr. C.K. Hisham.

REPORT

CONSTRUCTION OF POND IN MULLIYAKURSHI

In a remarkable display of social commitment, students from Al Jamia Arts and Science College collaborated with the NSS team to construct a pond in Mulliyakurussi. Initiated on December 23, 2018, this week-long endeavor involved 50 NSS volunteers under the leadership of Principal Riyas A.P. and NSS Programme Officer C.K. Hisham. The project was undertaken in response to acute water scarcity issues plaguing the area, marking a significant step towards addressing local environmental challenges.

The initiative was met with keen enthusiasm from the students, who actively engaged with the community to bring this project to fruition. Their dedication was evident as they worked tirelessly to excavate and prepare the site, ensuring the pond would effectively serve its intended purpose of water conservation. Beyond the practical aspects of construction, the initiative served as a catalyst for student development, enhancing their practical skills and fostering a deeper sense of civic responsibility.

The newly constructed pond holds immense value for the community, serving as a sustainable solution to water scarcity. It not only provides a reservoir for water storage but also contributes to groundwater recharge and supports local agriculture. The collaborative effort between the college and the community exemplifies the power of collective action in addressing pressing societal issues and underscores the institution's commitment to social welfare and environmental

stewardship.

Furthermore, the project has had a profound impact on the students involved, enhancing their understanding of environmental sustainability and instilling a sense of pride in contributing positively to their surroundings. It has also accelerated their working efficiency and ability to collaborate effectively in community-driven initiatives.

Looking ahead, Al Jamia Arts and Science College remains dedicated to maintaining and expanding the impact of the pond initiative. Plans include regular maintenance to ensure the pond's functionality, as well as educational outreach to promote water conservation practices among local residents. The success of this project serves as a testament to the transformative potential of student-led initiatives in fostering sustainable development and enhancing community resilience.

In conclusion, the pond building initiative undertaken by Al Jamia Arts and Science College students, with the support of the NSS team, stands as a model of proactive community engagement and environmental stewardship. It not only addresses immediate water scarcity issues but also empowers students to become agents of positive change in their communities. Through such initiatives, the college continues to embody its commitment to holistic education and societal impact, paving the way for a more sustainable and inclusive future.
